<b>Contact surface</b>	Robust rubber mat, light & inexpensive replaceable
<b>Size</b>	300 x 900 mm
<b>Rubber mat</b>	20 mm thick nubs
<b>Installation</b>	Space-saving on stable walls

The scrubbing option accommodates the comfort behaviour of the animals for fur grooming. The animals can groom parts of the body that they otherwise cannot reach (e.g. flanks). The typical scrubbing behaviour of the species is made possible.

Various monitoring systems require the following for cattle fattening scouring possibilities.
